## Z VEČ KOT 50-LETNO TRADICIJO PIŠEMO USPEŠNE ZGODBE NA PODROČJU GRADNJE IN VZDRŽEVANJA CEST.

»Z dolgoletnimi izkušnjami, strokovnostjo in zanesljivostjo sooblikujemo prihodnost cestnega omrežja nacionalnega okolja, s čimer si ustvarjamo nove priložnosti in utrjujemo svoj položaj tudi v mednarodnem okolju. Načrtno iskanje novih rešitev, nenehno posodabljanje tehnologij in zagotavljanje najvišjih kakovosti so vodila naše družbe. A pot napredka je moč kovati z golj trajnostno in odgovorno. Ne samo do okolja, temveč tudi do zaposlenih, naročnikov in vseh vpletenih. Z vsakim novim korakom udejanjamo razvojno strategijo in odločno zremo v prihodnost.«

---

## WITH MORE THAN 50 YEARS OF TRADITION, WE ARE WRITING SUCCESSFUL STORIES IN CONSTRUCTION AND ROAD MAINTENANCE.

»With our long-standing experience, expertise, and reliability, we help shape the future of the road network in our national environment, which in turn also creates new opportunities and strengthens our position in the international environment. A systematic search for new solutions, continual updating of technologies and ensuring the highest possible quality are the guidelines of our company. The path of progress however, can only be paved sustainably and responsibly. Not only towards the environment, but also towards employees, customers, and all involved. With every new step, we realise our development strategy and decisively look into the future.«

Igor Ukota  
Predsednik upravnega odbora  
Chairman of the Management Board

CPK

CPK

**CPK, d. d., družba za vzdrževanje cest, gradbeništvo in druge poslovne storitve, si je v svoji več kot 50-letni tradiciji utrdila prisotnost v primorsko-notranjski regiji. Z jasno zastavljeno razvojno strategijo – utrditi položaj med najvplivnejšimi družbami na področju gradnje in vzdrževanja cest ter drugih objektov na območju Slovenije in sosednjih držav - si svoj položaj utrjujemo tudi širše.**

---

Gradbeništvo je dejavnost, v kateri preživijo le kadrovsko najmočnejši, kapitalsko najstabilnejši in najprilagodljivejši ter razvojno naravnani. Zato smo se že pred leti odločili za pot napredka, rasti in večje poslovne uspešnosti, ki jo gradimo na podlagi dolgoletne tradicije, izkušenosti in strokovnosti.

**S kakovostnim delom, odgovornim odnosom do zaposlenih, poslovnih partnerjev in okolja ustvarjamo dolgoročno stabilno rast družbe.**

---

**Osnovni cilji družbe:**

- dobičkonosnost,
- dolgoročni razvoj,
- zadovoljstvo zaposlenih,
- ugled.

**Strateški cilji družbe:**

- dolgoročna finančna stabilnost,
- racionalno in učinkovito poslovanje,
- zadovoljstvo poslovnih partnerjev in okolja,
- usposobljenost in motiviranost zaposlenih,
- doseganje konkurenčne prednosti na področju tehnološkega razvoja.

**In its more than 50 years of tradition, CPK, d.d., Company for Road Maintenance, Construction, and other Business Services has strengthened its presence in the regions of Primorska and Notranjska. Our clear development strategy – to strengthen our position among the most influential companies in construction and road maintenance and construction of other facilities in Slovenia and in neighbouring countries – also strengthens our position on a broader scale.**

---

Construction is an activity in which only those with the strongest human resources, who have stable capital, are adaptable and development-oriented can survive. Already some years ago, we decided on a path of progress, growth, and increased performance, which we continue to build on our years of tradition, experience, and expertise.

**High-quality work, a responsible attitude towards our employees, business partners, and the environment allow us to generate long-term and stable growth of the company.**

---

**The main objectives of the company:**

- Profitability;
- Long-term development;
- Employee satisfaction;
- Reputation.

**Strategic objectives of the company:**

- Long-term financial stability;
- Rational and effective operation;
- Satisfaction of business partners and the environment;
- Qualifications and motivation of employees;
- Achieving a competitive advantage in technological development.

**Še pred pol stoletja z lesenimi in železnimi  
snežnimi plugi, mopedi, dvokolesi in tricikli,  
danes pa s sodobnimi in tehnološko dovršenimi  
vozili, stroji ter posipalci skrbimo za vaše vozne  
razmere in varnost.**

---

Uspešna zgodba na področju gradnje in vzdrževanja cest nastaja vse od leta 1961, ko je bilo ustanovljeno takratno Cestno podjetje v Kopru. S ciljem vzdrževanja in gradnje cest v primorsko-notranjski regiji smo v Senožečah leta 1966 postavili asfaltno bazo in vpeljali sodobno tehnologijo vgrajevanja asfalta.

Vse odtlej se ponašamo z izgradnjo cest in drugih objektov nacionalnega pomena ter odgovornim vzdrževanjem tako državnih kot lokalnih cest.

---

**Using wooden and iron snowploughs, mopeds,  
bicycles, and tricycles only half a century  
ago, today we see to your driving conditions  
and safety with modern and technologically  
advanced vehicles, machines, and gritters.**

---

The successful story of construction and road maintenance is being written since 1961, when the Koper Road Company was established. In 1966, an asphalt plant with modern paving technology was erected in Senožeče for the maintenance and construction of roads in the regions of Primorska and Notranjska.

Ever since, we pride ourselves on the construction of roads and other facilities of national importance and on responsible maintenance of both national and local roads.

goriv v Senožečah.  
The first asphalt plant  
constructed together with a  
facility for storing binding agents  
and fuel in Senožeče. **1966**

Ustanovitev družbe Cestno  
podjetje v Kopru.  
Setting up of the Koper Road  
Company. **1961**

Postavljeni prvi odpraševalni  
napravi v kamnolomih Črni Kal in  
Razdrto.  
The first dust collectors installed  
in the Črni Kal and Razdrto  
quarries. **1971**

Ustanovitev delovne organizacije  
ZCP, Cestno podjetje Koper n.  
sub. o., v sestavi dveh temeljnih  
organizacij: TOZD Gradnje in  
TOZD Vzdrževanje in varstvo  
cest.

The setting up of the ZCP,  
Cestno podjetje Koper n. sub.  
o. work organisation composed  
of two main organisations:  
TOZD (Basic Organisation for  
Associated Labour) Construction  
and TOZD Road Maintenance  
and Safeguarding. **1983**

Začetek obratovanja sodobnega  
kamnolomskega postrojenja v  
Razdrtem.  
The start of operation of a  
modern quarry in Razdrto. **1981**

Pridobitev Znaka kakovosti v graditeljstvu za kakovost proizvodov kamnoloma Razdrto. Awarded the certificate of quality in construction for the quality of products from the Razdrto quarry.

**2000**

Lastninsko preoblikovanje v delniško družbo z nazivom Cestno podjetje Koper d. d., družba za gradnjo in vzdrževanje cest. Ownership transformation into a shareholders company, i.e. Koper Road Company, d.d. Company for Construction and Road Maintenance.

**1998**

Ekološka posodobitev z izgradnjo nove odprševalne naprave in rekonstrukcija kamnolomskega postrojenja v Razdrtem.

Ecological modernisation with the construction of a new dust collector and reconstruction of the plant in the Razdrto quarry.

**2007**

Začetek obratovanja nove četrte avtomatizirane asfaltne baze v Senožečah. Zaključek izgradnje nove Operativne baze Hrpelje, v katero se preseli operativni del družbe.

Start of operation of the new fourth automated asphalt plant in Senožeče. Completed construction of the new Hrpelje Operational Base, which becomes the new location of the operations segment.

**2006**

Združitev upravnega in operativnega dela na lokaciji v Hrpeljeh.

The merger of the management and operational part in Hrpelje.

**2015**

Ustanovitev CPK d.d., Podružnica Istra s sedežem v Puli na Hrvaškem. Družba pridobi certifikat o ravnanju z okoljem ISO 14001.

Setting up of CPK d.d., the Istria Subsidiary with headquarters in Pula in Croatia. The company obtains the ISO 14001 Environmental Management Certification.

**2014**

Prva rekonstrukcija postrojenja kamnoloma Razdrto.

The first reconstruction of the plant in the Razdrto quarry.

**1991**

Družba prejme certifikat sistema vodenja kakovosti ISO 9001.

The company receives the ISO 9001 Quality Management Certification.

**2002**

Cestno podjetje Koper d. d. se preimenuje v CPK, d. d., družba za vzdrževanje cest, gradbeništvo in druge poslovne storitve.

Koper Road Company, d.d. renamed into CPK, d.d., Company for Road Maintenance, Construction and other Business Services.

**2001**

Širitev izvajanja rednega vzdrževanja državnih cest na območje dela Notranjske. Začetek delovanja Cestne baze Podskrajinik.

Expansion of implementation of regular maintenance of national roads to a part of the region of Notranjska. Start of operations of the Podskrajinik Road Maintenance Base.

**2012**

Praznovanje 50-letnice delovanja družbe.

50th anniversary of the company.

**2011**

Prehod na enotirni sistem vodenja.

Transition to a one-tier management system.

**2010**

## **Za vsakim uspešno izpeljanim projektom in zadovoljnim poslovnim partnerjem venomer stojijo ljudje. Zato je trajnostno upravljanje s človeškimi viri naša prioriteta.**

---

Vlaganje v zaposlene je investicija v prihodnost. Uresničevanje poslovnih ciljev se odraža v premišljeni politiki zaposlovanja in skrbi za izobraževanje ter osebnostni razvoj zaposlenih. Prav tako med pomembne prednostne naloge uvrščamo zagotavljanje varnosti in zdravja pri delu.

Zavedamo se pomena tradicije in dolgoletnih izkušenj, zato nenehno skrbimo za prenos znanja in najboljših praks na mlajše sodelavce.

Uspešna zgodba naše družbe se ne prične z zadovoljstvom zvestih poslovnih partnerjev, ampak z zadovoljnimi, zavzetimi in zvestimi zaposlenimi. Le-ti ustvarjajo našo največjo konkurenčno prednost.

---

**Behind every successfully completed project and a satisfied business partner there are always people. Responsible human resource management is thus our priority.**

---

Investments in employees are investments for the future. The realisation of business objectives is reflected in a deliberate employment policy and care for the training and personal development of employees. One of our important priority tasks is also ensuring health and safety at work.

We are aware of the importance of tradition and years of experience and we continually see to the transfer of knowledge and best practises to our younger colleagues.

Our company's successful story does not begin with the satisfaction of our loyal business partners but with satisfied, eager, and loyal employees. They are the ones who generate our greatest competitive advantage.

A photograph of an industrial conveyor belt system against a clear blue sky. The conveyor consists of several metal structures, including tall support towers and a central processing unit, all connected by a network of cables and pipes. Large piles of light-colored aggregate or gravel are visible in the foreground and middle ground, partially obscuring the conveyor. The overall scene conveys a sense of industrial activity and modern infrastructure.

SMO IZKUŠENI,  
ZANESLJIVI

RELIABLE, AND  
MODERN

ZAGOTAVLJAMO  
NAJVVIŠJO  
KAKOVOST  
WE GUARANTEE  
FIRST-CLASS  
QUALITY

**Z odkrivanjem razvojnih trendov, najsodobnejšimi znanji in tehnologijami dosegamo visoko stopnjo zaupanja naših poslovnih partnerjev. Najvišja raven kakovosti je ključna na vseh ravneh delovanja, zato ji namenjamo veliko pozornosti.**

---

Zavidljivo kakovost, ki je primerljiva tudi z mednarodnim okoljem, dosegamo z uporabo vrhunskih materialov, uveljavljenimi tehnološkimi postopki in strogim nadzorom. Poleg kakovosti nam konkurenčno prednost zagotavlja tudi lastna proizvodnja materialov in njihova certificirana kontrola.

Da poslovanje temelji na najvišjih standardih, dokazuje pridobljen certifikat sistema vodenja kakovosti po ISO 9001.

---

**By discovering development trends, modern knowledge, and technologies, we achieve a high rate of confidence among our business partners. The highest level of quality is of key importance in all levels of operations and special attention is thus paid to this aspect.**

---

Envious quality, which is comparable in the international market, is achieved by using top-quality materials, established technological procedures, and strict control. Competitive advantage is also provided by own production of materials and their certified control.

The fact that our operation is based on the highest possible standards is also proven by the obtained ISO 9001 Quality Management Certification.

**V več kot pol stoletni tradiciji smo se naučili vzpostavljati, graditi in ohranjati medsebojne odnose, ki temeljijo na odgovornosti, spoštovanju in visokih etičnih merilih. Na ta način dejavno prispevamo k trajnostnemu razvoju celotne družbe.**

Vključevanje trajnosti v vse poslovne procese ni zgolj naša usmeritev, temveč zaveza. Je pot, na kateri si vedno znova postavljamo cilje, nove usmeritve in spremljamo svoje dosežke.

Na zahteve in izzive časa odgovarjamo z jasno zastavljeno dolgoročno razvojno strategijo in zavedanjem svoje tesne povezanosti z naravnim in družbenim okoljem.

Dosledno upoštevamo okoljske predpise in delujemo v skladu s sistemom ravnanja z okoljem ISO 14001. Odgovoren odnos do okolja pomembno vpliva na naše poslovanje, razvoj in ugled družbe.

**In more than half a century of tradition, we have learned to establish, build, and maintain interpersonal relationships that are based on responsibility, respect, and high ethical standards. We thus actively contribute to a sustainable development of the whole society.**

Including sustainability in all business processes is not merely our direction but our commitment. It is a path on which we continue to set objectives and new directions and monitor our achievements.

We respond to the requirements and challenges of time with a clearly set long-term development strategy and with the awareness of our close connections with the natural and social environment.

We consistently observe environmental regulations and act in accordance with the ISO 14001 environmental management system. Our responsible attitude towards the environment significantly affects our operations, development, and the company's reputation.

VEDNO  
TRAJNOSTNO IN  
ODGOVORNO  
ALWAYS  
SUSTAINABLE AND  
RESPONSIBLE

# NAŠE DEJAVNOSTI

Celovito izvajanje letnega in zimskega vzdrževanja državnih in občinskih cest.

Comprehensive implementation of summer and winter maintenance of national and municipal roads.

Strojne in prevozne storitve za lastne potrebe.

Machinery and transportation services for own needs.

Nadzor kakovosti vgrajenih lastnih proizvodov.

Quality control of installed own products.

Gradnja objektov nizke gradnje.

Civil engineering structures.

Proizvodnja vseh vrst asfaltnih zmesi v lastni asfaltni bazi v Senožečah.

Production of all types of asphalt mixtures in own asphalt plant in Senožeče.

Proizvodnja kamnitih materialov v lastnih kamnolomih v Črnom Kalu in Razdrtem.

Production of stone materials in own quarries in Črni Kal and Razdrto.

Proizvodnja kamnitih materialov v kamnolomu Črni kal

Production of stone materials in Črni kal quarry

**V svoji zgodovini smo uspešno zgradili številne objekte in se v javnosti zapisali kot dobri gradbeniki, strategi in tehnologi, kar nam omogoča trden položaj na domačem trgu ter odpira možnosti za uveljavitev na tujem.**

---

S strokovno in tehnično podkovanim kadrom, sodobno opremljenimi asfalterskimi skupinami za strojno in ročno vgrajevanje asfalta ter modernizirano gradbeno mehanizacijo smo pomemben akter na področju gradnje cest v Sloveniji in širše.

Številne pridobljene izkušnje iz gradnje cest smo prenesli na gradnjo kanalizacijskih omrežij, zunanjih ureditev, parkirišč, športno-rekreacijskih površin, bencinskih servisov, sanacij plazov, usadov in podobnih objektov.

Med naše ključne prednosti spadajo lastna proizvodnja kamnitih materialov in asfalta ter kakovostno in pravočasno opravljene storitve.

**Throughout our history, we have successfully constructed numerous facilities and have become known to the public as construction experts, strategists, and technologists, which ensures a strong position in the national market and opens opportunities to establish ourselves in the international market.**

---

Our professionally and technically qualified staff, modern asphalt paving teams for automated and manual installation of asphalt and up-to-date construction machinery make us an important player in the field of road construction in Slovenia and beyond.

We have transferred our experience that we have gained in the construction of roads to the construction of sewerage networks, landscaping, the construction of parking lots, sports and recreational facilities, petrol stations, rehabilitation of areas stricken by landslides and slumps, and similar facilities.

Our key advantages are our own production of stone materials, asphalt, high-quality and timely services.

# GRADIMO WE BUILD

# VZDRŽUJEMO WE MAINTAIN

**Skrb za vozne razmere na 1.908 kilometrih cest, od katerih je 733 kilometrov državnih cest in 1.175 kilometrov lokalnih cest in javnih poti, je naše poslanstvo na področju vzdrževanja cest.**

---

Cestna infrastruktura sodi med nacionalna bogastva, zato je odgovorno, varno in kakovostno vzdrževanje cest ena izmed naših ključnih dejavnosti. Zaradi velikih klimatskih razlik med posameznimi območji, pomembnosti cestnih povezav in frekvence prometa, je območje vzdrževanja naše družbe eno najzahtevnejših in specifičnih v slovenskem prostoru.

Podkovani s strokovnjaki, najsodobnejšo mehanizacijo in novimi tehnologijami skrbimo za čim večjo prometno varnost in pretočnost prometa.

Vzpostavljeni Cestne baze Koper, Sežana, Ilirska Bistrica in Podskrajnik, z rednim, celovitim in strokovnim vzdrževanjem cest, skrbijo za območja občin Piran, Mestne občine Koper, Hrpelje - Kozina, Divača, Sežana, Komen, Postojna, Pivka, Ilirska Bistrica, Bloke, Cerknica in Loška dolina.

**Ensuring good driving conditions along 1,908 kilometres of roads, of that 733 kilometres of national roads and 1,175 kilometres of local roads and public routes, is our mission in road maintenance.**

---

The road infrastructure is a part of national treasures and responsible, safe and high-quality maintenance of roads is thus one of our key activities. Major climatic differences between individual sections, the importance of road connections and traffic frequency make the maintenance sector of our company one of the most demanding and specific ones in Slovenia.

Backed up by experts, state-of-the-art machinery, and new technologies, we ensure the highest possible traffic safety and flow.

The services of regular, comprehensive, and professional maintenance of roads provided by the Koper, Sežana, Ilirska Bistrica and Podskrajnik Road Maintenance Bases cater to the territories of the municipalities of Piran, Koper, Hrpelje – Kozina, Divača, Sežana, Komen, Postojna, Pivka, Ilirska Bistrica, Bloke, Cerknica, and Loška dolina.

# PROIZVAJAMO WE PRODUCE

Lastna proizvodnja kakovostnih materialov v kamnolomih Črni Kal in Razdrto ter asfaltni bazi Senožeče, njihove mešanice preverjene kakovosti in pridobljeni certifikati (ISO 9001 in ISO 14001) predstavljajo strateško in konkurenčno prednost družbe ter ustvarjajo zadovoljstvo naročnikov ob prevzemu materialov in objektov.

Own production of high-quality materials in the Črni Kal and Razdrto quarries and the Senožeče asphalt plant, their mixtures of tested quality as well as the obtained certifications (ISO 9001 and ISO 14001) represent the company's strategic and competitive advantage and result in the satisfaction of customers upon the takeover of materials and facilities.

# ASFALTNA BAZA SENOŽEČE SENOŽEČE ASPHALT PLANT

**Asfalt uvrščamo med enega najstarejših gradbenih materialov, ki se najpogosteje uporablja za asfaltiranje cestišč. Njegovi začetki segajo v daljno leto 1870, še danes pa omogoča kakovostno, enostavno in hitro gradnjo.**

---

Proizvodnja prve asfaltne baze družbe CPK sega v leto 1966. Vse odtej si prizadevamo za tehnološke in ekološke posodobitve ter povečujemo svoje zmogljivosti. Danes avtomatiziran proces omogoča proizvodnjo različnih vrst asfaltnih zmesi. V okviru asfaltne baze, zmogljivosti 160 ton na uro, deluje tudi sodobno opremljen laboratorij, katerega naloga je skrben nadzor kakovosti.

**Asphalt is one of the oldest construction materials usually used for the paving of roads. Its beginnings date back to 1870, and today it still enables high-quality, simple, and fast construction.**

---

The production of the first asphalt plant of CPK d.d. dates back to 1966. Ever since, we have been striving for technological and ecological modernisations and increasing our capacities. Today, the automated process enables the production of different types of asphalt mixtures. The asphalt plant, with a capacity of 160 tonnes of asphalt mixture per hour, has a laboratory with advanced equipment whose primary task is careful quality control.

# KAMNOLOM RAZDRTO RAZDRTO QUARRY

**Zaradi izgradnje cest in s tem povezane potrebe po surovinah, je po drugi svetovni vojni ob robu vasi Razdrto pričel nastajati istoimenski kamnolom, katerega proizvodnja se je iz leta v leto povečevala in danes dosega kar 130.000 m<sup>3</sup> letno.**

Apnenec iz tamkajšnjega pridobivalnega prostora omogoča kvalitetno predelavo v pesek, drobljenec in tamponski material. Zaradi bližine asfaltne baze Senožeče, ta material v pretežni meri uporabljamo za lastno proizvodnjo asfaltnih zmesi. Visoko kakovostni materiali zagotavljajo zadovoljstvo tudi najzahtevnejšim odjemalcem.

Vse večje povpraševanje po materialih in ekološki izzivi nas vodijo do številnih posodobitev kamnolomskega postrojenja in novejše mehanizacije, v okviru katerih si prizadevamo za varovanje in ohranjanje okolja.

**Road construction and the related need for raw materials after the Second World War have caused the development of the Razdrto quarry along the outskirts of the village of Razdrto. Its production has been growing year by year and today stands at 130,000 m<sup>3</sup> annually.**

The limestone obtained from the quarry enables high-quality processing into sand, crushed stone, and sub-base materials. Due to the vicinity of the Senožeče asphalt plant, this material is mostly used for own production of asphalt mixtures. High-quality materials ensure the satisfaction of the most demanding customers.

The growing demand for materials and ecological challenges have led to numerous modernisations of the quarry plant and newer machinery and it is within this framework that we strive for the protection and preservation of the environment.

36/37 Kamnolom Črni Kal | Črni Kal Quarry

# KAMNOLOM ČRNI KAL ČRNI KAL QUARRY

**Kamnolom Črni Kal velja za najstarejši kamnolom na Primorskem, saj izkoriščanje tamkajšnjih materialov sega v čas pred drugo svetovno vojno. Sprva ročno nakladanje surovin je danes posodobljeno in mehanizirano.**

Glede na petrografske in mehanske lastnosti pridobljen apnenec kamnoloma uvrščamo med visoko kakovostne surovine.

V okviru kamnoloma poteka predelava v pesek, drobljence in tamponske materiale, primerne za betone in voziščne konstrukcije. Obenem se pripravlja lomljenc (odminiran ali izbran) in različno veliki bloki za zaščito morske obale in vodotokov. Zmogljivost postrojenja kamnoloma je 75.000 m<sup>3</sup> zdrobljenih materialov letno.

**The Črni Kal quarry is the oldest quarry in the region of Primorska, as the quarrying of materials in this territory dates back to pre-WWII times. The initially manual loading of raw materials has been modernised and mechanised today.**

In terms of its petrographic and mechanical properties, the quarried limestone is considered high-quality raw material.

Within the quarry, materials are processed into sand, crushed stone, and sub-base materials that are suitable for concrete and road structures. The quarry also produces chippings (blasted or graded) and blocks of various sizes for the protection of the seashore and watercourses. The capacity of the crushing plant is 75,000 m<sup>3</sup> of crushed materials annually.

**Naša vizija, postati ena najvplivnejših družb v Sloveniji na področju gradbeništva in vzdrževanja cest, nas žene k iskanju novih razvojnih perspektiv, ki bodo odgovarjale na izzive naslednjih desetletij. Z zavzetimi in usposobljenimi zaposlenimi bomo zastavljeni cilje uresničevali osredotočeno, odgovorno in okoljsko učinkovito.**

---

Trdni in na medsebojnem zaupanju osnovani odnosi s poslovnimi partnerji ostajajo še naprej eno od pomembnejših prizadevanj naše družbe. Pri tem nam je ključno razumevanje potreb in izpolnjevanje njihovih pričakovanj. Obenem bomo, zavezani visokim standardom poslovne etike, povečevali odgovornosti do okolja, v katerem delujemo.

Kljud zahtevnim gospodarskim razmeram sodimo med uspešnejše in finančno stabilne družbe. Zaradi jasne razvojne strategije in udejanjanjem zastavljenih ciljev, nas pogled v prihodnost navdaja z optimizmom.

**Our vision to become one of the most influential companies in Slovenia in the field of construction and road maintenance drives us towards searching for new development perspectives, which will meet the challenges of future decades. Eager and highly-trained employees will allow us to realise our objectives with high focus, responsibly and environmentally efficiently.**

---

Strong relationships with our business partners, which are based on mutual trust, remain one of the most important endeavours of our company. Understanding their needs and meeting their expectations are of key importance. Furthermore, we shall remain bound to high standards of business ethics while simultaneously increasing the responsibility towards the environment in which we operate.

Despite demanding economic conditions, we are among the more successful and financially stable companies. Our clear development strategy and the realisation of the set objectives mean that we look into the future with optimism.
